Dear Josh

Thanks for your note with information about Ralph Dorfman.

I went to see Dr Masland at N.I.H. on my way to other meetings and discussed with him and some of his associates a tentative research program which was based heavily on the suggestions you made while visiting with us. This program aroused sufficient interest on their part to encourage me to meet a March / deadline of pertinent applications for support. Dr Saloway from Nat. Inst. for Neurological diseases will come to Philadelphia ~~to~~ by the end of this week to go over a tentative draft, which I am in the process of preparing. I wish there was more time left for me to get the whole thing in a presentable shape to send you a copy and incorporate your comments.

Koprowska

This will be probably not feasible.
I will let you know, however, if and what
~~type~~^{type} of program, I will ultimately propose
and what type of support would be
required. It is my impression that it
may be wiser to ask for more rather
than less money in order to enhance
chances of a favorable consideration.

The whole venture is quite
exciting

Please accept and transmit
to Esther my kindest greetings

June
